CAREER

Fullstack Developer 01-02-2023 - Al presente
OCA

As a Full Stack SSR Developer at OCA, I participated in maintaining legacy platforms in .NET Core, ASP Classic, and SQL Server, applying MVC, SOLID principles, and Stored Procedures. I contributed to the migration from .NET to ReactJS on the frontend in collaboration with the UX/UI team and the implementation of APIs in NestJS for the backend, following the SCRUM methodology. I used Bitbucket for version control, implemented automated tests with Cypress (TDD), and performed API testing in Postman, as well as SQL queries and manual deployments on servers.

Software Developer Freelance 01-08-2021 - 01-12-2024
Freelance

At Guarino Inmuebles, we developed a real estate website with a back office using Next.js, Chakra UI, CSS, and Framer Motion on the frontend, and Node.js, Koa.js, and SQLite on the backend. In addition to the technical implementation, I participated in solving infrastructure issues, decision-making, and task coordination to ensure the proper functioning of the system.

Software Developer Freelance 01-08-2021 - 01-11-2024
Freelance

As a freelancer, I worked in a team of three to develop a landing page for Evolutiva Consulting, a marketing consultancy. I implemented the frontend using Next.js, Chakra UI, CSS, and Framer Motion, also collaborating on the design and optimization of the page to enhance user experience and customer conversion.

Fullstack Developer 01-02-2022 - 01-12-2023
Secretaría De Innovación Y Transformación Digital

I participated in identifying and documenting system issues, collaborating with the UX/UI team under the SCRUM methodology. I contributed to the development of an internal back office and the implementation of CI/CD in Red Hat. On the backend, I worked with Python (FastAPI), and on the frontend, I used React and Chakra UI.
